Automotive Technology: A Systems Approach

AUTOMOTIVE TECHNOLOGY: A SYSTEMS APPROACH, 5th Edition remains the leading authority on automotive theory, service and repair procedures. The new edition has been updated to include coverage of hybrid vehicles throughout the text, new content on electronic automatic transmissions, preventive maintenance, and many other topics that reflect the most recent changes in the industry. Chapters cover the theory, diagnosis and service of all system areas for automobiles and light trucks, and the content closely adheres to the 2008 NATEF Automotive Program Standards.

Christ I'm Confused

In the 20 chapters the author has detailed as much recall as possible of the activities of the 470th CIC Detachment in the Canal Zone during the Cold War, 1953-54. The story is told as first person narrative but with the author using a different name. Each chapter serves to tell an individual anecdote with many evidences of the confusion that existed among agents at the time. The anecdotes are true, the language and detail are as recalled in later years. The reader can determine that much of the average day's work was quite ordinary and methodical.
